

> AUTOMOTIVE SYSTEMS

Ready to head down the road to a new career?

Lethbridge College's Automotive Systems certificate program is the perfect place to start your engine. In just one year, you'll receive practical training in automotive systems and learn about everything from simple components to advanced computerized vehicle systems. You'll get plenty of hands-on experience repairing a variety of vehicles, from customer vehicles to shop units to your own ride using the state-of-the-art tools and equipment in the Crooks School of Transportation. Upon completion you'll be eligible to write the 1st year and 2nd year Apprenticeship exams.
