

> WIND TURBINE TECHNICIAN

Ready to shift your career with the future of power?

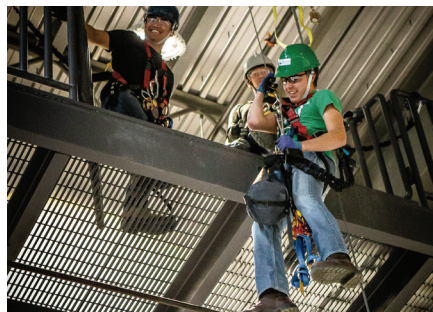

Be at the forefront of one of the fastest growing technologies in the world in less than a year in our Wind Turbine Technician program. Designed to meet international certification standards, you'll get the skills and experience needed to succeed by working on actual wind turbine components in our shop and scaling the campus training tower. Within this program you may be eligible to write the 1st Year Electrical Apprenticeship exam.
